

Virtual Solutions

HOSTED NETWORK

We are pleased to offer you an Internet-based, SAS-70 Type-II secure office network that you and your team can access easily, reliably, and securely with only a computer and an Internet connection. A Hosted Network is the easiest way for your organization to move into the cloud enabling flexibility, security, and reliability.

FULL-FEATURED QUICKBOOKS

QuickBooks Hosting provides ease-of-use because it is a full-feature version same as you run on your local PC, but it is running on a remote server, inside a "virtual PC" – a computer we set up just for you. It offers many benefits, one of which is the peace-of-mind of nightly back-ups and banking-class security so that you can stay focused on your business and customers.

OUR OFFERING DELIVERS:

- Leased QuickBooks Licenses which will enable you to get started right away without the up-front costs of a full QuickBooks license and provides for continual updates and upgrades.
- Anywhere, anytime secure access with an Internet connection.
- Run QuickBooks from any PC without having to install QuickBooks.
- Multi-User access of the same QuickBooks company file lets a multiple users, such as yourself, employees and us, to be in the same file at the same time.
- Access multiple QuickBooks company files from a single logon. You can work with multiple company files for the price of just one user logon.
- Subscribe to extended features like integrated credit card processing.
- Get the reliability of fully-clustered, multi-tier infrastructure from a provider that is trusted by Fortune 100 corporations including Bank of American.
